Subject: Re: Donegal Township RTKR 12.24.16

Good Morning Michael,

First let me tell you that I was really pleased with the Planning Commission Meeting from last week. Also, I wanted to let you know that I do have all the track copies and word copies of all the zoning drafts from EPD along with ALL communications to/from EPD, township & residents regarding all the zoning drafts, so if any time you need something I have no problem sharing. We are here to work with, for the rights of the people, and for following the law, we are not against planning. I am a stickler for doing things right by the law.

I wanted to let you know that I did get a chance to go to the township on Friday, January 20, 2017, to start making copies from my right to know request from 12.24.16, however as I was going through the documents I realized that I was not given access to the bill that comes from The City of Wheeling for the Sewage Plant and the Township Building. What I am looking for is the individual meter reading bills over the past several years for those two accounts, I am pretty sure they come as separate bills because when you look at the bill calculation sheets for example the 9/26/16 - 10/26/16 report states that 309 bills were sent out and that total came from Water W.Alex Res=287, Water W.Alex Com=17, Water-W.Alex-NC=3 & WTR W.Alex Com HYD=2, when you add these up you get 309. So **what I was looking for is the individual bills for those items. I am not asking for residents bills just the public ones for Donegal.** I do believe that this request would have been covered by my #2 request when I asked for "any information about or for Donegal Township water and/or sewage that are prepared, produced by, sent to and/or from Donegal Township, Tom Bibby, DEP, City of Wheeling Water". And also from my #3 request I asked about the NC accounts "any and all reports or descriptions that explains each item in detail on the Bill Calculation report from The City of Wheeling Water Department as regards to the items highlighted on the attached copy. This would be Water-West Alex-NC which has 3 bills".

Also, I know that I asked before but I know that when I was in before Sharon was working on a **spreadsheet for water**, it was never given to me or was there a reason as to why I wasn't given an opportunity to pay for a copy if items needed to be redacted. Can you let me know where we are with that item?

And last I didn't have time to **copy all the years for #2 so if when these other documents are ready for me to inspect and scan with my own device I would like to have that same box with all the info from #2 again** (it was a box with all water/sewage bills/payment folders for each year) I can finish my scanning.

I do not want to file an appeal but if you instruct me to I will, so if you can have them get the documents for me to scan I would greatly appreciate it.

Thanks for all your hard work,
Tammi
